STATUE OF LIBERTY

The Statue of Liberty, which is a colossal neoclassical sculpture on Liberty Island in the middle of New York Harbor, in Manhattan, was designed by Frédéric Auguste Bartholdi and inaugurated on October 28, 1886. It was a gift to the United States from the people of France. The statue greeted millions of immigrants as they came to America by ship in the late 19th and early 20th centuries and is recognized as a symbol of the United States. It became one of New York's most famous tourist attractions.

HACHIKO

Hachiko was a dog born in 1923 and brought to Tokyo in 1924. His owner, Professor Eisaburo Uyeno and he were inseparable friends. Each day Hachiko would accompany his owner to Shibuya train station when he left for work. When he came back, the professor would always find the dog patiently waiting for him. Sadly, the professor died at work in 1925 before he could return home. Hachiko was still a young dog, the love between him and his owner was very strong and he continued to wait at the station every day for his return.

COFFEE

Coffee cultivation first took place in Southern Arabia. The earliest credible evidence of coffee-drinking appears in the middle of the 15th century in Yemen. In the Horn of Africa and Yemen, coffee was used in local religious ceremonies. These ceremonies conflicted with the Christian church, so the Ethiopian Church banned the pagan consumption of coffee. The beverage was also banned in Ottoman Turkey during the 17th century for political reasons, and was associated with rebellious political activities in Europe.

PLANETS

How is it only our planet has life? Will we ever travel to other planets? These are questions people often think about. We think our planet is the best. It looks so beautiful from space with its mixture of blue and green. The other planets look too strange. Mercury is just a red, hot ball, pretty much the same as Mars. Saturn looks like a real planet. Its rings give it an extra-special look. The other planets don't look that interesting. When we were at school, we learnt that Pluto was a planet. But now it isn't. Scientists have decided there are now only eight planets in our solar system and not nine.

DRACULA

Jonathan Harker was an estate agent who was trying to sell an old house in London to Count Dracula. Harker went to Dracula's Castle in Budapest, even if the inhabitants tried to convince him to not go. The castle was very strange with a lot of locked door but Harker's room was very comfortable. At the beginning Dracula was very gentle with him. He ate and talked several times with Dracula. Harker didn't know that there was no way to escape to the castle and he was a Vampire's prisoner.

MODERN TECHNOLOGY

Modern technology is changing the way we live our lives. But is it really a positive thing? Research shows that around 28% of children in the UK are overweight or obese. Some people think that this is because young people spend too much time online and not enough time socialising with their friends and playing outside. In the past, nearly all children walked to school because their parents didn't have a car. They didn't have all the luxuries that many children have now, so they used their imaginations and played outdoors in the fresh air.

FORD MOTOR COMPANY

Ford Motor Company is an American automotive corporation founded in 1903 by Henry Ford and 11 associate investors. Henry Ford built his first experimental car in a garage behind his home in Detroit in 1896. After formation of the Ford Motor Company, the first Ford car was assembled in July 1903. Five years later, in 1908, the successful "Model T" was produced. Demand for this car was so great that Ford started new mass production methods in order to manufacture it in sufficient quantities. In 1913 he introduced the world's first production line for cars.
